Please extend or reopen the comment period on this proposal.

The issues are complex and far reaching. Although Navy personnel and EPA officials are paid (by we taxpayers) to create and review this proposal, regular citizens (we taxpayers) must take time out of our lives, making a living and raising families, to comprehend and comment. A fair amount of time should be granted to allow us to do so. Our drinking water depends upon it.

Water is life, and it should not be poisoned.

I am hopeful that the EPA, after 2020, will once again protect public health, as it did during former administrations.

Thank you.

Dianna MacLeod
